Overall dimensions with wheels (mm)	630x535xH1230
Useful height (U)	26U
Useful height (mm)	1 156
Useful depth (mm)	530
Maximum device depth (mm)	530 mm
Type of Opening	Front and back OpenRoad® removable flat lids
Material	9 mm birch plywood
Finishing	Phenolic coated
Color	Brown
Type of Latches	Recessed sliding latches

OPENROAD® 19" RACK 26U DEPTH 530MM

A 19" rack with excellent value for money

The 19" rack OPENROAD® 26U depth 530 mm is specifically designed for 19" devices. It combines **practicality and ergonomics**, while providing **effective protection and strong durability**, whether for a **19" audio or video equipment**.

A practical and robust transport rack for 19" devices

This 19" rack OPENROAD® 26U depth 530 is made of full birch plywood, ensuring **strong resistance** to heavy loads, while remaining **lightweight and sturdy**. Its brown phenolic coating provides protection against wear and projections, while being easy to clean.

The **front and rear covers, flat and removable**, allow **quick and convenient access** to 19" devices, while being space-saving during transport and storage. The OPENROAD® locking system, ergonomically designed and patented by Rythmes & Sons in 1996, features a recessed sliding latch. This system offers an **intuitive, smooth, and secure opening/closing**, reducing the risk of accidents. For added protection, an **optional lock** can be installed to prevent unauthorized access to the equipment. The recessed handles, equipped with a double return spring, provide **optimal comfort**. They automatically return to a flat position, **preventing snagging risks** during transport. **Protective pads** located underneath the rack ensure **better stability** during transport or when placed on a surface.

Inside, the rack is equipped with 19" steel rack rails, positioned at the front and rear, with square holes for M6 cage nuts (supplied). These square holes allow for a **flexible and secure installation** of 19" devices.
