### FIRST AID AND FIRE SAFETY "CROWDSAFETY" CASE

The organization of major events is subject to strict regulations, in particular in terms of participant's safety and spectators.

The modernization Act of civil security of 13 August 2004 aims to improve the prevention and management of crisis situations. It is in this idea that we have designed the "CrowdSafety" case.

**The objective is to enable a rapid and effective emergency operation, keeping ready at hand the equipment for first aid and fire fighting.**

### FLIGHT CASE

- > Cabinet-style configuration
- > Hinged lids with opening in 2 identical parts
- > 9 mm birch plywood with red (RAL 3020) rigid PVC laminate
- > 2 large recessed butterfly latches with guided opening/closing mechanism
- > 2 lid stays (rear-mounted in recessed dish)
- > 4 recessed spring-loaded handles with double sprung
- > 4 swivel castors Ø100 (2 with brake) on mounting plates
- > 1 swivel castor Ø100 under the lid
