LIGHTWEIGHT DIM. 600X400XE15 CASTOR DOLLY

Lightweight range, sturdy and easy to handle for safe and effortless transport

This 600x400xE15 **sturdy and Lightweight dolly** is made of 15 mm birch plywood. Its **non-slip coating ensures perfect stability of goods**, reducing the risk of slipping during transport.

An **ergonomic cutout makes handling easier**, providing a quick and effortless grip.

Equipped with Ø100 mm swivel castors, this rolling platform offers **optimal maneuverability on flat and hard surfaces**.

Its rubber-tread wheels with ball bearings ensure **smooth and silent movement**, even under load.

Strong and reliable, the Lightweight dolly supports up to 500 kg, making it ideal for **transporting heavy equipment** in warehouses, workshops, stores, event stages, and more.

It adapts to various professional sectors requiring frequent and secure handling.

Developed and manufactured by Rythmes & Sons in France
