800x600xH600

OPENROAD® composite transport trunk

CARACTÉRISTIQUES TECHNIQUES

Référence produit	ORC 0866 BLK
Poids net (kg)	16.00
Brand	OPENROAD®
Overall dimensions with wheels (mm)	800 x 600 x H600
Interior dimensions (mm)	770 x 570 x H570
Volume (liter)	251
Max. load	Max. 50 kg
Material	12mm polypropylene structured-core panel
Finishing	Grained
Color	Black
Type of Opening	OpenRoad® top removable flat lid
Lid stays	No
Type of Latches	Recessed sliding latches

OPENROAD® LIGHTWEIGHT TRUNK 800X600X600

A lightweight and robust transport case, ideal for lightweight equipment

In a drive for innovation and weight reduction, Rythmes & Sons has developed a range of OpenRoad® cases in 12mm polypropylene structured-core panel, offering an **ultra-lightweight alternative** to the standard OpenRoad® wooden models.

This case, measuring 800x600x600, is designed and manufactured in Alsace (France) by Rythmes & Sons. It meets the expectations of professionals looking to **optimize transport** while **reducing transportation costs**, without compromising the security of their equipment.

The honeycomb composite panel provides an optimal balance between **lightness and strength**, ensuring effective protection for **fragile and lightweight equipment**.

Its **ergonomic recessed handles** minimize the risk of snagging during handling and **facilitate maneuverability**.

Its **ergonomic locking system**, invented by Rythmes & Sons in 1996, simplifies everyday use. Thanks to a pressure latch, opening and closing are quick and secure. Its **flat, lightweight, and space-saving lid** features a side attachment system, allowing it to be suspended on the side of the case for **quick and convenient access to the contents**.

This model is not equipped with wheels but features 4 stacking plates, allowing users to **stack multiple cases to reduce floor space usage** and **facilitate storage** in warehouses and trucks.

Thanks to its **lightweight yet robust design**, this case is an optimal solution for transporting and storing equipment that requires reliable and durable protection.

Its **low weight** and **optimized dimensions** help improve vehicle loading efficiency and **reduce logistical costs** related to transportation.

Number of Latche(s)	2	<i>We do not recommend this trunk for heavy material and products carrying high internal thrust on the lid</i>
Type of Handle	Steel Recessed flip handle(s) with double sprung	
Number of Handle(s)	4	Developed and manufactured by Rythmes & Sons in France
Dish for stacking	No	
Stackable	Yes, 4 stacking plates	
Castors	Without
