

Flight cases / Racks, Control Desks & 19" Integration Solutions / Mobile racks for AV control and production

15U 19" Mobile production rack
+ sliding shelf + 32" monitor
+ 2 tables

TECHNICAL SPECIFICATIONS

Product reference	FVR 115-E32TC2T
Net weight (kg)	129.00
Brand	RYTHMES & SONS (flight-cases)
Overall dimensions with wheels (mm)	800x800xH1740
Useful height (U)	15U

15U VIDEO PRODUCTION RACK WITH SLIDING SHELF, 32" SCREENS SUPPORT AND 2 TABLES

Mobile and ergonomic control station

This video control rack 15U is designed to provide a comprehensive and mobile solution, enabling the quick and efficient deployment of a video control station for any type of event. Whether it's for a live event, festival, theater, or conference, this video control rack allows for a fast setup in an optimized space while ensuring maximum protection for the equipment.

Crafted from durable 9 mm all-birch plywood with a phenolic brown coating, this rack offers superior strength and resistance to impact and wear. It features removable front and rear lids, providing quick access to equipment and making cabling and setup effortless. To maximize functionality, we have integrated folding legs into each lid, allowing them to be converted into stable and practical worktables, providing extra workspace for documents or computing equipment.

The recessed butterfly latches are designed with guided opening and closing mechanisms, ensuring enhanced security and smooth handling. The spring-loaded recessed handles, equipped with double return springs, ensure a comfortable grip during transport. To facilitate handling and maneuverability, corner handles are fixed to each lid.

Mobility is a key feature of this video control rack, which is why it is equipped with a rolling base featuring free and lockable casters, ensuring easy transportation and perfect stability once installed.

The interior layout is designed to enhance efficiency and organization, making the installation and use of audiovisual equipment seamless.

In the upper section, a 19" 3U slot allows the integration of essential devices such as audio/video interfaces, servers, or routers. The tiltable VESA 100/200 mount is designed to hold a screen up to 780 mm wide, offering a clear and adjustable viewing angle.

Additionally, this rack includes a drawer on ball-bearing slides, providing a secure and easily accessible storage space for essential tools or equipment. A sliding shelf on ball-bearing slides is also incorporated, specifically designed for a keyboard, ensuring optimal ergonomics for operators.

In the lower section, a 19" 12U rack space with front and rear steel mounting profiles allows for additional 19" equipment to be securely installed. Two side storage compartments are also available to store accessories and complementary equipment.

This video control rack is the perfect solution for professionals and AV technicians who need a highly functional and durable workstation. Thanks to its robust construction and ergonomic design, it allows you to optimize every event setup, ensuring an efficient, ready-to-use installation in minimal time.

Useful height (mm)	667	Developed and manufactured by Rythmes & Sons in France
Useful depth (mm)	580	
Type of Opening	Front and back removable lids	
Material	9 mm birch plywood
