REMOVABLE TRAY H250 MM FOR OPENROAD® TRAY RACK 800X600

Designed to fit perfectly into a OpenRoad® Tray rack 800x600, this removable bin is a **practical and robust solution** for storing and transporting parts, tools, or consumables.

Made from **9 mm film-coated birch plywood**, it offers **excellent strength** and **good durability**, even in demanding industrial environments.

The **2 side cut-outs** serve as **ergonomic handles**, making manual handling easier.

With **usable dimensions of 708x504xH235 mm**, this bin is lightweight and easy to handle.

As a removable element, it can be taken out of the bin rack to be **transported individually, moved to another workstation, or used for off-site operations** a key advantage for operational flexibility.

Examples of items to transport:

Small mechanical parts, fasteners, wiring accessories, consumables (gloves, adhesives, wipes, etc.), electronic components, small percussion instruments, ...

This bin is ideal for professionals looking for modularity, durability, and practicality.
