A mobile emergency equipment

The organization of major events is subject to strict regulations, in particular in terms of participant's safety and spectators.

The modernization Act of civil security of 13 August 2004 aims to improve the prevention and management of crisis situations. It is in this idea that we have designed the «CrowdSafety».

Interior feature for each part

- Plexi front panel with cutouts for handling
- Locking system warranty
- Velcro straps for securing and maintaining the equipment

The objective is to enable a rapid and effective emergency operation, keeping ready at hand the equipment for first aid and fire fighting.
